

Environmental Policy

Environmental Policy

Pritex Ltd. regards the promotion of its Environmental policy as an integral part of its management objectives. This Policy sets out the framework by which we seek to Protect the Environment during our work activities.

Policy Summary

SCOPE

The Pritex Environmental Management System covers the testing and conversion of foam, Fibre & associated materials, for the automotive, industrial and furniture industries carried out at its main Wellington Manufacturing site.

Prevention Of Pollution

Pritex Ltd. regards the prevention of pollution as an important part of its environmental objectives, and will continually strive to ensure adequate controls are in place to prevent conditions that could pose a threat to the environment.

We will support the efforts of pollution prevention by our customers and suppliers.

Compliance With Regulation / Law

Pritex Ltd. is committed, not only to maintain compliance with relevant laws, regulations, and specific customer requirements, but wherever possible to exceed these requirements as part of our quest for continual improvement. Where existing laws and regulations are not adequate to assure protection of the environment, Pritex will establish the necessary controls to meet our own environmental standards.

Continual Improvement

We are committed to monitoring and continually improving management of environmental issues, and the impact Pritex has upon the environment. This includes working with our customers to help develop improved recyclability of component parts. We will strive to reduce waste, particularly foam waste and waste sent to landfill, and improve our use of resources.

We will review our environmental performance regularly to support continual improvement.

G Jones

Managing Director
